

EDUCATION

Yıldız Technical University

Mathematics

2022 - 2027

Aspiring Data Scientist with a strong foundation in machine learning principles and data analysis, currently completing my Mathematics degree. My core competencies include leveraging Python to process data and build predictive models, along with a solid command of SQL for database querying. I've also worked with modern AI tools and agentic workflows to support and accelerate analysis. I am a proactive learner, passionate about uncovering insights from complex datasets, and looking for an opportunity to grow and contribute my skills in a professional environment.

SKILLS

- MS Excel
- SQL / MSSQL
- Python
- Tableau/Power BI
- Data Management
- Machine Learning
- Deep Learning
- AI Agents / LLMs
- Software Engineering:
Full-Stack Development,
Git, API Design,Docker

EXPERIENCE

TREX

Data Science Intern | Aug 2026 - Oct 2026

Reconstructed a industrial telemetry dataset into an analysis-ready pipeline, correcting coverage gaps, sensor artifacts, and inconsistent failure labeling
Engineered a leakage-free feature set and evaluated a LightGBM risk-classification model across walk-forward folds with alarm-budget-constrained thresholds

Diagnosed confounded features and regime shifts via systematic ablation to separate genuine signal from data-artifact

Benchmarked alternative modeling approaches (survival analysis, time-series foundation models) and presented trade-offs to guide adoption decisions

ILETISIM SOFTWARE

Data Science Intern | July 2026 - Aug 2026

Cleaned and validated industrial sensor data, resolving calibration drift, placeholder records, and misattributed machine-state transitions

Built and benchmarked RUL prediction models: regression, classification, Cox proportional hazards, and LSTM

Conducted literature and dataset review to guide modeling approach
Authored technical report summarizing methodology and findings for stakeholders

GOOGLE AI & TECHNOLOGY ACADEMY

Fellow (Data Science Track) | Dec 2025 - Sep 2026

Selected for an intensive, highly competitive fellowship program focused on Advanced Data Analytics and AI development.

COOK | THE INN RESTAURANT (MI, USA) | SUMMER 2025

RETAIL ASSOCIATE | FOOD LION (NC, USA) | SUMMER 2024

PROJECTS

FINSIM: FINANCIAL BEHAVIOR SIMULATOR

A gamified platform simulating life events and investment strategies to improve financial literacy through AI-powered feedback.

PREDICTIVE MAINTENANCE DASHBOARD

Built an industrial predictive maintenance platform combining ML-based fault detection with a LangGraph multi-agent fleet simulation.

NEUROQUANT STOCK PREDICTOR

Developed a live dashboard predicting stock trends using Deep Learning and Sentiment Analysis.
